LIGHTING

MEET BIG DOT:

WE DELIVER THE FUTURE TO
YOUR CAR WASH OPERATION

bigdot
LIGHTING

Custom lighting packages ARE the future of the car wash industry. Become an early adopter and gain the benefits of standing out in an often crowded market. Specializing in both traditional white LEDs and vibrant RGBW systems, we create lighting experiences that don't just brighten your car wash spaces—they transform them.

Innovation with Purpose: At Big Dot, innovation isn't just about creating something new—it's about creating something better. We design every product and technology with a singular focus: to serve our customers and meet their real-world needs. Our mission is to help businesses operate more efficiently, cost-effectively, and serve their customers better, too. That's the driving force behind everything we do.

TRUST THE EXPERTS:

OUR LIGHTING SYSTEMS ARE SIMPLE,
AFFORDABLE AND BUILT TO LAST.

Since 2014, Big Dot has been redefining what lighting can do.

With our cutting-edge RGBW technology, car wash owners can attract more customers, boost revenue, and stand out in an increasingly competitive market. From new installations to precision retrofits, our energy-efficient, user-friendly solutions are designed to take your business to the next level. We not only create custom lighting solutions for car wash operations, but also specialize in all types of commercial lighting, including retail, industrial applications and lighting for large manufacturing facilities. With superior control systems, easy installation, and customizable options, we're helping car wash owners across Europe, Australia and the U.S. enhance their operations and attract more customers.

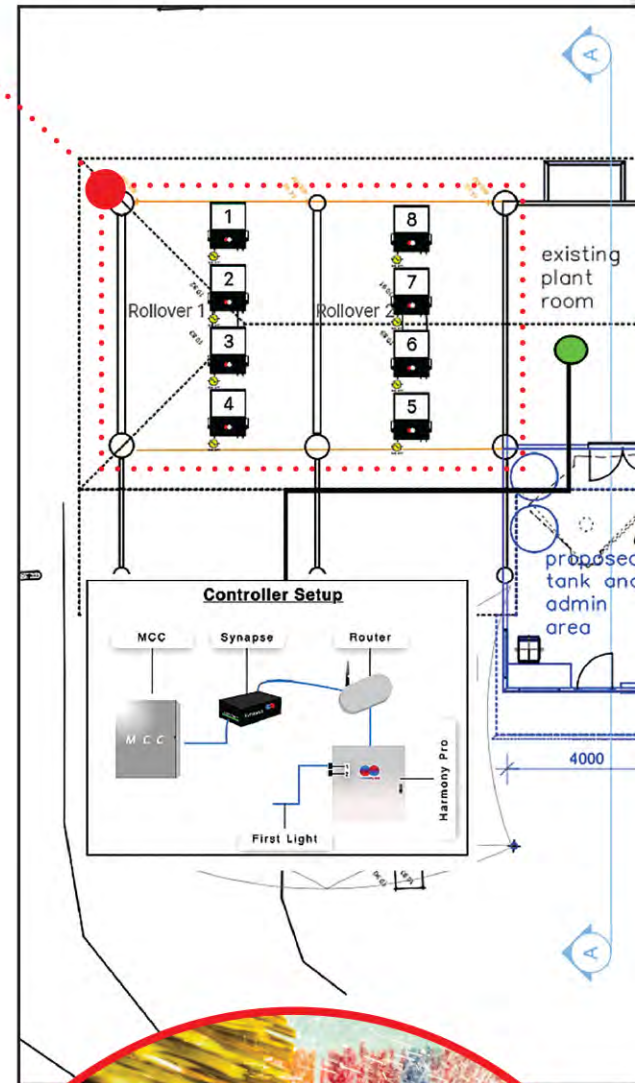

IN-BAY AUTOMATIC LIGHTING

The most attractive, yet affordable upgrade on the market for your IBA; a coloured light show is great way to custom brand your site. Big Dot's lighting displays entice customers to choose your business over the competition. From vibrant colours to dancing light shows set to music, our solutions offer the creative freedom to express your brand's identity and engage your audience in new ways.

16 Million Colour Options: Tailor your lighting to your brand and space, with infinite options for creative displays. Brand your site in the colours of your local sports team to show support during finals, tie light shows into holiday and charity campaigns, and brand for the seasons as they change—the possibilities are endless, and right in the palm of your hand with our intuitive app!

Safety Features: Instantly trigger emergency lighting protocols—such as turning lights white for an emergency stop—with built-in safety settings.

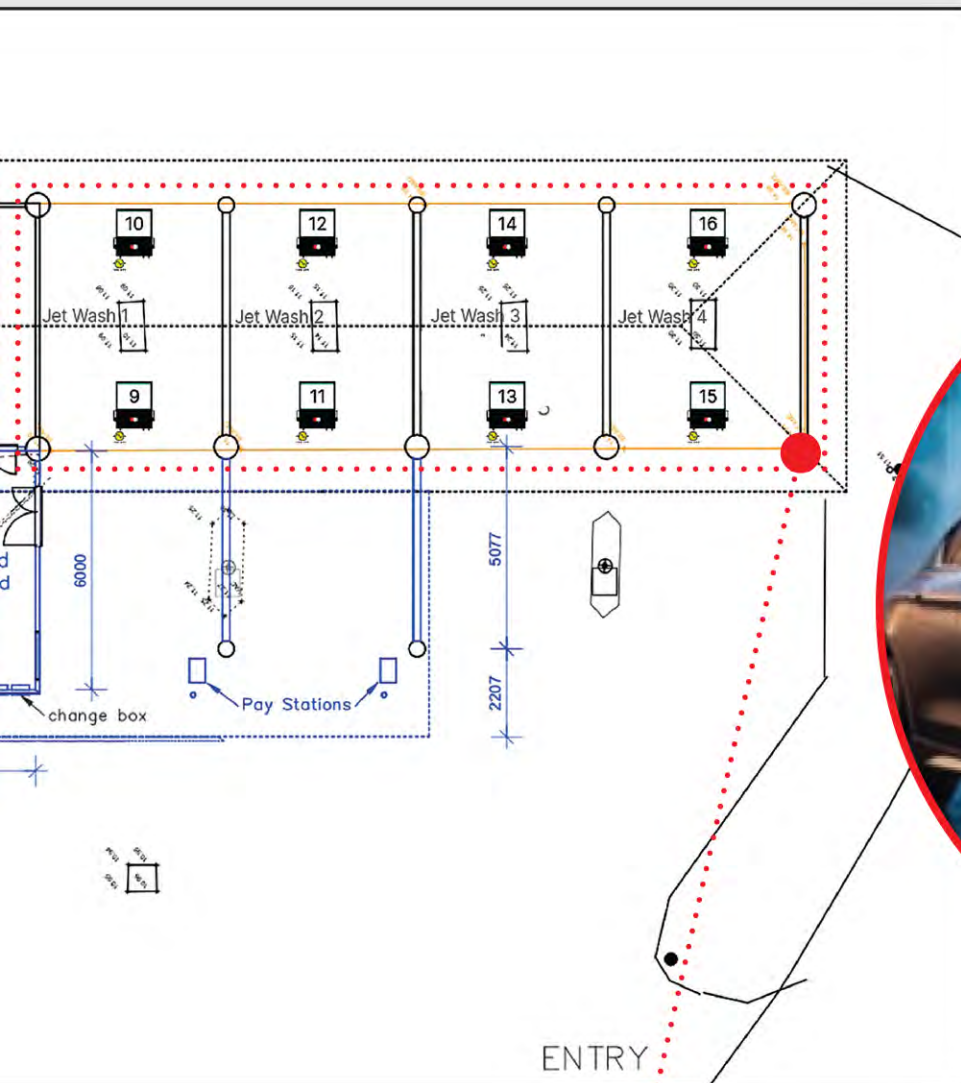

HARMONY — A SMART LIGHTING CONTROLLER

DESIGNED FOR EFFICIENCY & CONTROL

The Harmony Controller is the brain behind our dynamic lighting solutions. It gives car wash owners complete control over their light shows, with the ability to schedule and manage everything remotely from anywhere in the world. Whether you want to create a vibrant light show to attract customers, or set cleaning schedules, or implement emergency protocols, Harmony makes it easy. It even integrates with your music system, allowing you to sync the lights to a custom soundtrack for an immersive experience. With our latest AI development, we can create your unique lighting experience within our proprietary app.

JET WASH LIGHTING

Jet Wash is the original and most widely used car wash in the world. Big Dot can help you stand out in a crowded market with a fully controllable lighting system. Update your current site with a fresh, new look with simple-to-install and maintain custom lighting.

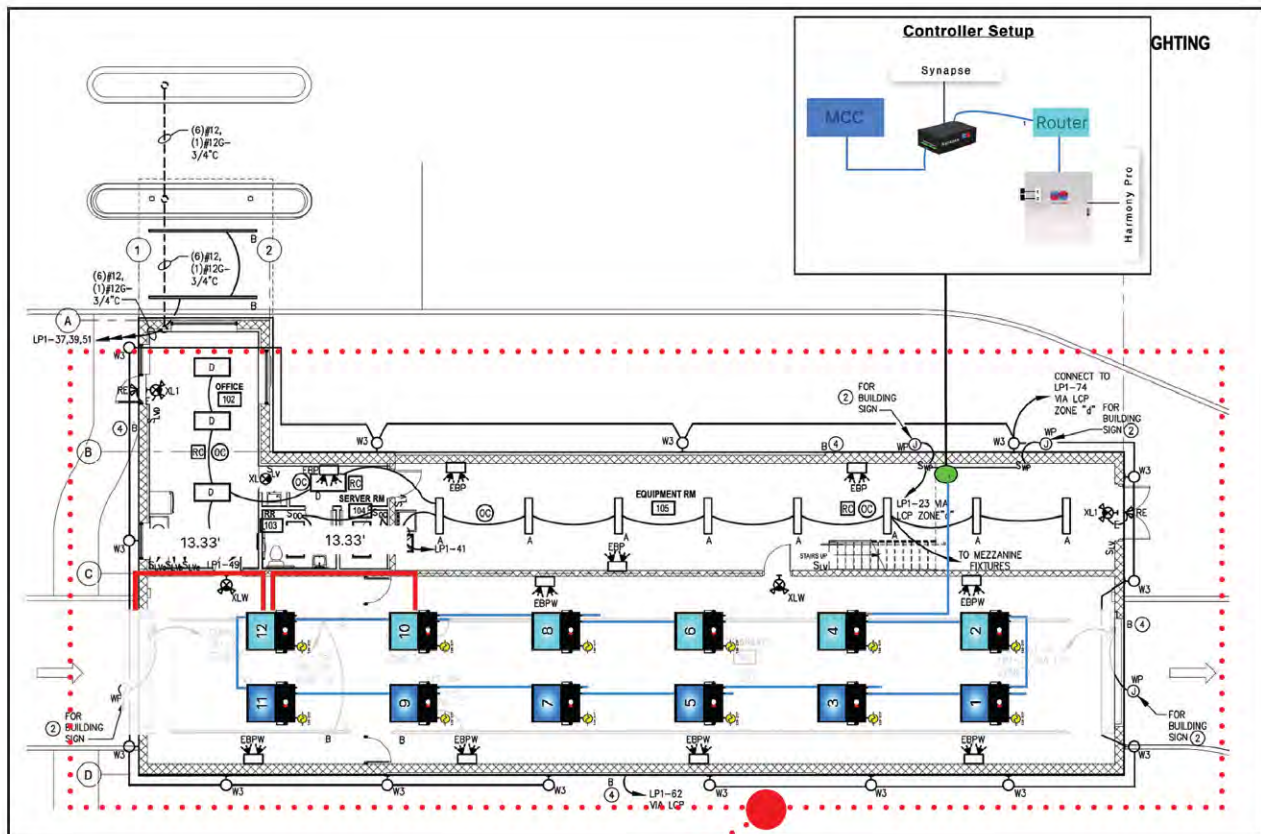

Wireless Controls: Our wireless technology will eliminate the need for low voltage installations, reducing labour and materials costs.

Hassle-Free Setup: Our systems are designed to be as "dummy proof" as possible, with all the hardware and components included for a seamless setup.

Remote Control: Manage your lighting system from anywhere, at any time, using our exclusive app.

TUNNEL LIGHTING

Let Big Dot bring your entire car wash tunnel to life with a full lighting solution. Big Dot's lighting products are designed to flood your entire car wash tunnel with light, providing full coverage and eliminating the need for multiple fixtures. While other companies rely on linear tube lights with narrow beam angles, our flood lights offer superior luminosity and coverage with fewer fixtures.

Built to Last in Harsh Environments: Big Dot's lighting systems are built to withstand constant exposure to water, chemicals and dust, with high durability and an IP66-68 rating, meaning they're completely protected from water and dust intrusion.

Complete Lighting Solutions: We provide a full lighting layout incorporated into your architectural and electrical plans, offering a comprehensive service that most competitors do not.
